I am a full-stack web developer seeking an opportunity to expand my expertise and contribute to challenging web development projects.

## SKILLS

HTML, CSS, JavaScript, React.js, node.js, Express.js, Redux Toolkit, DSA, Tailwind CSS, Core java, MongoDB, Sequelize.

## PROJECTS

### Boat Clone Ecommerce Website

Developed a boat-clone e-commerce website with an integrated admin panel, User can view products and categories, update profile detail, add products to their cart, place order and view and track their orders, Admin can perform CRUD operations on products and categories and also change order status, Strapi Headless CMS is used for data management and user authentication.

### Note Book Website

This is a simple yet powerful and flexible notes making application. We can use markdown and latex to style our notes. We can structure the notes in tree like structure with unlimited depth, a Breadcrumb component is given for easy navigation. Preview is available while making notes. All users have privacy for storing notes with email-password authentication. Technologies Used: ReactJS, NodeJS, Express, MongoDB.

## WORK EXPERIENCE

### Livegate Technologies

(02/2022 - 02/2023)

Full Stack Web Developer

- Developed and maintained web applications using Node.js, Express.js for the backend and React for the frontend, handling client requirements effectively.
- Contributed to a 20% increase in project efficiency by streamlining code and optimizing development processes.
- Helped team members with their work during my free time, fostering a collaborative environment.
- Stayed updated with new technologies, sharing insights and discussing their application with the team.
- Ensured high-quality code and efficient solutions for various project needs.
